

How do I delete a functional location?

Delete Functional location

1. The delete flag should be set for the functional location.
2. Run program RIARCTPV via SE38 transaction and enter in the functional location.
3. Then execute program RIARCTPA via SE38 transaction, which will create a file.
4. Execute program RIARCTPD, and select the session from above step 2, after executing which will delete the functional location.
