

How To Load Flat File In Excel To Oracle?

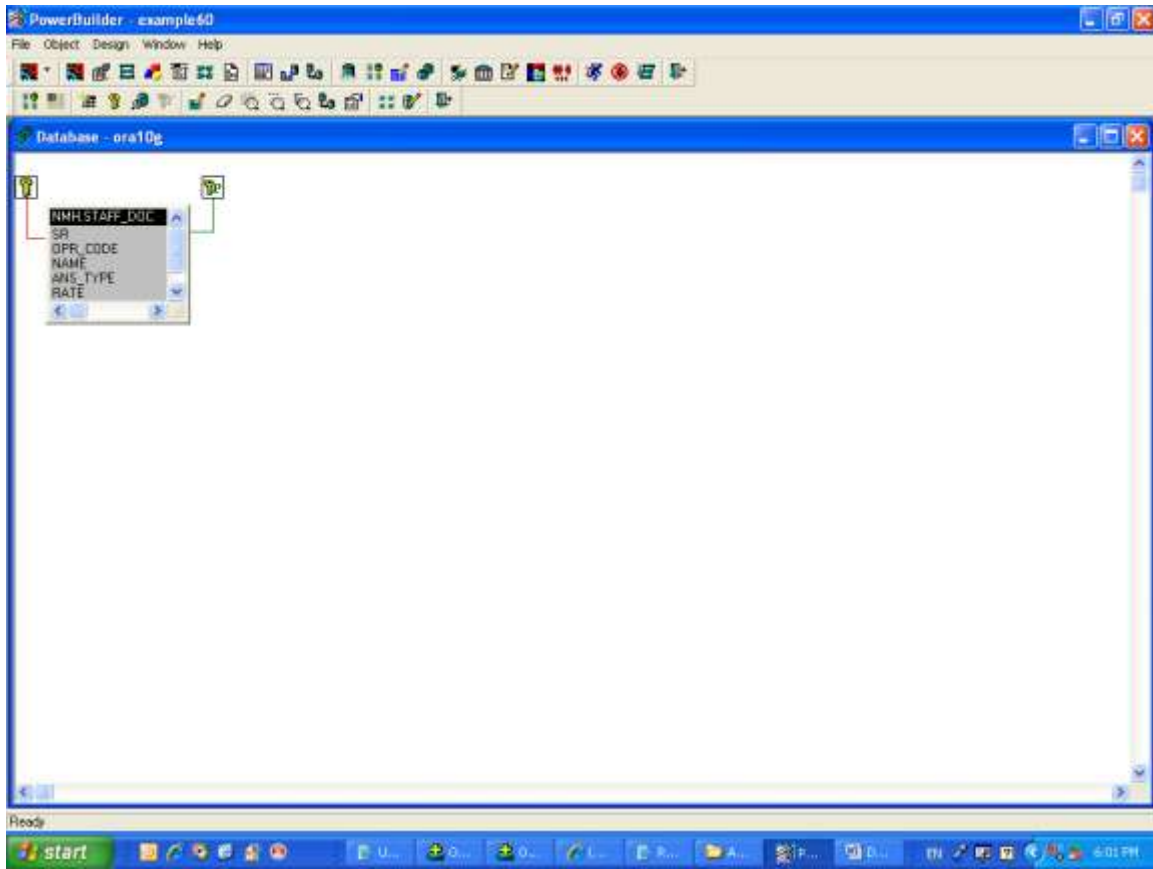

Steps to load Flat file (Data in Excelsheet to Oracle 10g)

By: Kamal

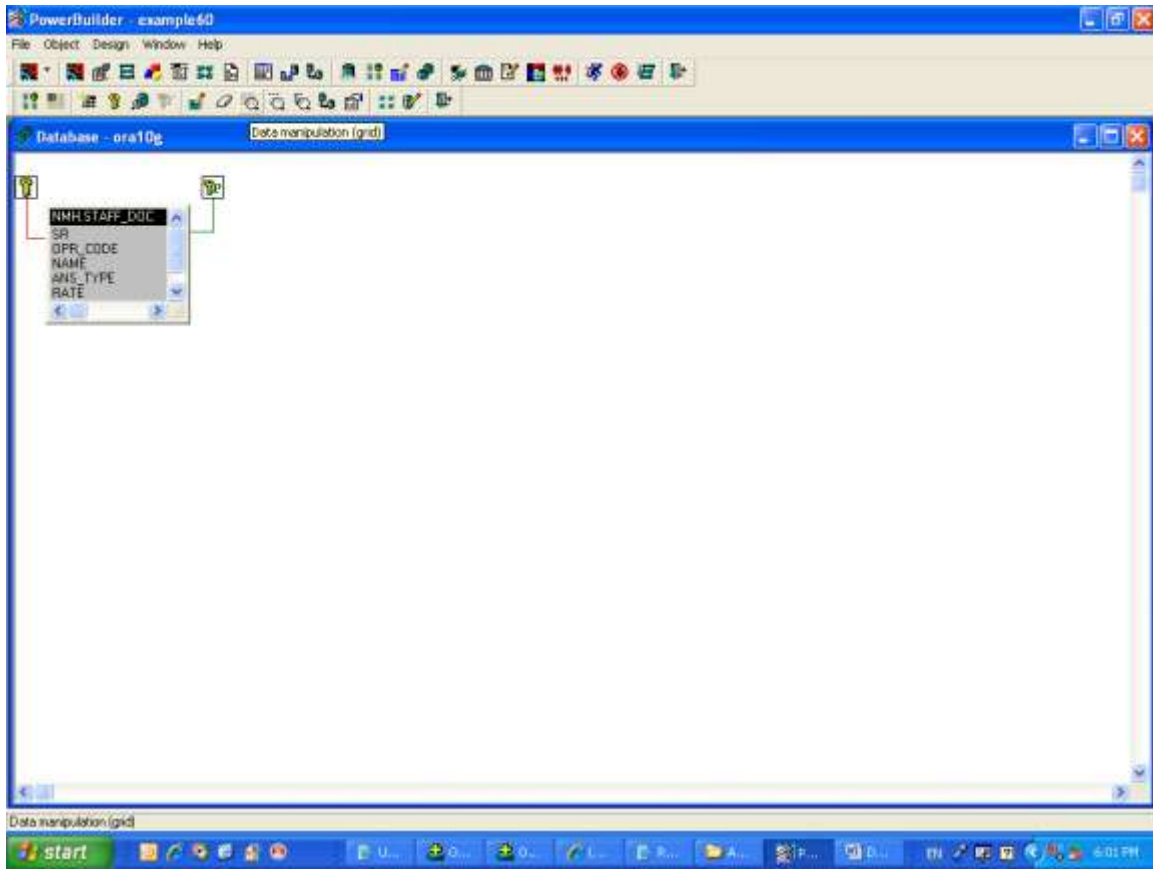

- 1) Better Install Powerbuilder
 - 2) If excel Sheet file name for example is **a.xls** then
 - 3) Save excel file into notepad file as **a1** in tab **delimited format**
 - 4) Then open a1 file delete the proceeding and leading spaces if appearing first and last of the notepad
 - 5) Again excel file into notepad file as **a2** in **UTF-8 format**
 - 6) Open powerbuilder
 - 7) Select Icon name **Database**
 - 8) Select the appropriate table , you want to load
 - 9) Click Icon **Datamanipulation Grid**
 - 10) Select form toolbar **Rows->Import**
 - 11) Select the file ie **a2**
- Then your data is well loaded into Oracle 10g
